DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4, 9-13, & 16, drawn to an adaptive error diffusion arrangement using different correction methods, classified in class 358, subclass 3.05.

II. Claims 5-6 & 14-15, drawn to an error diffusion arrangement, classified in class 358, subclass 3.03.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it has utility as an error diffusion arrangement. The subcombination has separate utility such as error diffusion using a single consistent correction method.

Art Unit: 2624

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
